

U.S. CENSUS BUREAU

HIGHER EDUCATION CONSORTIUM

A Collaborative Network for Impactful Partnerships

The vision of the U.S. Census Bureau's Higher Education Consortium (CBHEC) is to transform how the Census Bureau works with the full spectrum of higher education institutions nationwide.

The CBHEC is a collaborative network between the Census Bureau and higher education institutions that aim to improve data access, enhance Census Bureau statistical products, and strengthen the next generation of statistical innovators.

The network brings together higher education institutions across the nation to share expertise, challenges, and opportunities in accessing and using Census Bureau data.

Through the consortium, institutions will:

GAIN ACCESS

to Census Bureau resources and training.

COLLABORATE

on practical applications, such as integrating Census Bureau statistics into classroom instruction, capstone projects, research, project-based learning, and other uses.

CONNECT

and collaborate with institutions across regions and academic disciplines.

EXPLORE

innovative ways to strengthen statistical literacy across disciplines.

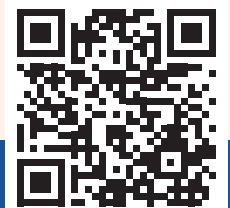

CONTRIBUTE

to and benefit from best practices and resources across the network.

BETTER DATA.
STRONGER EDUCATION.
BRIGHTER FUTURE.
